Extension of the GLOCK license for the Civil Airsoft market

CYBERGUN, a global player in recreational shooting, announces the signing of a new license

With the Austrian weapon manufacturer GLOCK for the civil airsoft market.

This agreement strengthens the links between the CYBERGUN group and the gun manufacturer and follows the first strategic contract signed in 2015 to meet the training needs of the armed forces and the police. GLOCK has once again entrusted the CYBERGUN Group to develop the civil airsoft market in France (Dom Tom included).

This contract is a world first expected for more than 20 years by all the market players and the first deliveries will take place for the public on August 28th 2017. The group estimates this market to be nearly 2 M € per year.

GLOCK has become synonymous with reliability and innovation throughout the world since the GLOCK 17 in the 1980s, which has given the Austrian brand a worldwide reputation. The latter has been the origin of new standards for pistols as a rule and for the entire GLOCK family in particular.

GLOCK now equips military and police forces in more than 100 countries. In the US, the .40 caliber equips 2/3 of federal agencies including the most prestigious.

As a reminder, in 2015, CYBERGUN and GLOCK had already signed a first professional agreement to develop replicas for the training of the armed forces and police ([cf press release from october 12th 2015](#)).

In this context, Spartan Military & Law Enforcement, the training division of the CYBERGUN group, led by General (2S) Emmanuel MAURIN, has developed numerous replicas thanks to this collaboration, notably GLOCK 17 and GLOCK 19. Several units are currently being used by many forces around the world.

CYBERGUN further strengthens its position as the world's leading licensed airsoft and is continuing its efforts to consolidate its portfolio of more than 25 long-term licenses with world-class brands that represent real opportunities for development.
